## 1. MARINE ACTIVITIES

### 1.1. Summary:

Mariners are advised that the vessel '**Seaspan Situla**' will commence monopile installation noise monitoring operations within the East Anglia THREE Offshore windfarm area circa the 30/03/2025. Operations will be conducted by Seaway 7 and Seiche. The main working area will be inside of the CDM Zone of the wind farm array as detailed in section [2.1](#).

**During the monopile installation noise monitoring campaign, all vessels are requested to keep a 500m safety distance from the Seaspan Situla.**

### 1.2. Activity Description:

**Seaspan Situla** will deploy noise monitoring equipment during installation of the first **six** piled foundations. Noise monitoring will be conducted using a combination of moored monitoring stations and vessel-based deployment. Prior to each piling event to be monitored, **four** moored stations will be deployed on the seabed in a straight transect at distances of 500-750 metres, 1.5km, 3-6km and 8-15km. Each station will have a mounted hydrophone which will sit approximately 2.5 metres above the seabed. The vessel-based deployed hydrophone will be positioned in the middle of the water column.

Positions of deployed noise monitoring equipment will be notified via future notice to mariners.

### 1.3. Program Schedule:

- The '**Seaspan Situla**' is expected to mobilise at Den Helder circa the 30/03/2025 and commence operations within the East Anglia THREE CDM zone circa the 01/04/2025.
- During the installation of the first six monopiles, the '**Seaspan Situla**' will deploy noise monitoring equipment in different locations, these locations will be notified via future notice to mariners as and when deployed.
- Completion of the noise monitoring operations will be communicated via a future notice to mariners.
