1. MARINE ACTIVITIES

1.1. Summary

Please be advised that Circa 5th of July 2024, Hughes Subsea (HSS) will commence operations conducting near shore UXO investigation and clearance works along the export cable route near Bawdsey. Diving operations will be carried out from the vessel ‘**HM Denham**’ to identify potential UXO’s. Mariners are hereby advised that diving operations will be carried out during slack water periods and all vessels are required to maintain a minimum of 500 meters safety distance from ‘**HM Denham**’ making minimal wash and navigating with caution. The below vessels will maintain a listening watch on VHF Channel 16 throughout. **HM Denham** will be supported by vessels **Hughes Hunter** and **Balvenie**.

1.2. Activity Description

The scope of work for the HM Denham comprises of surface fed diving to conduct Potential unexploded ordinance identification of 20 targets, followed by disposal or relocation activities as required. Whilst conducting operations HM Denham will be moored using a 3-point mooring arrangement and an alpha flag will be displayed whilst diving operations are underway.

1.3. Programme Schedule

Operations will be conducted in day light hours only and are dependent on tides. The estimated time for leaving the harbour is 0500 BST daily and the estimated time of leaving the field is 1700 BST. The below vessels base port during operations is Harwich. Any confirmed UXO, disposal or relocation activities will be communicated in future NTM’s.
