Appendix 7.6 Ferry Route Visualisations

Prepared for
ScottishPower Renewables

Appendix 7.6 Ferry Route Wireframes

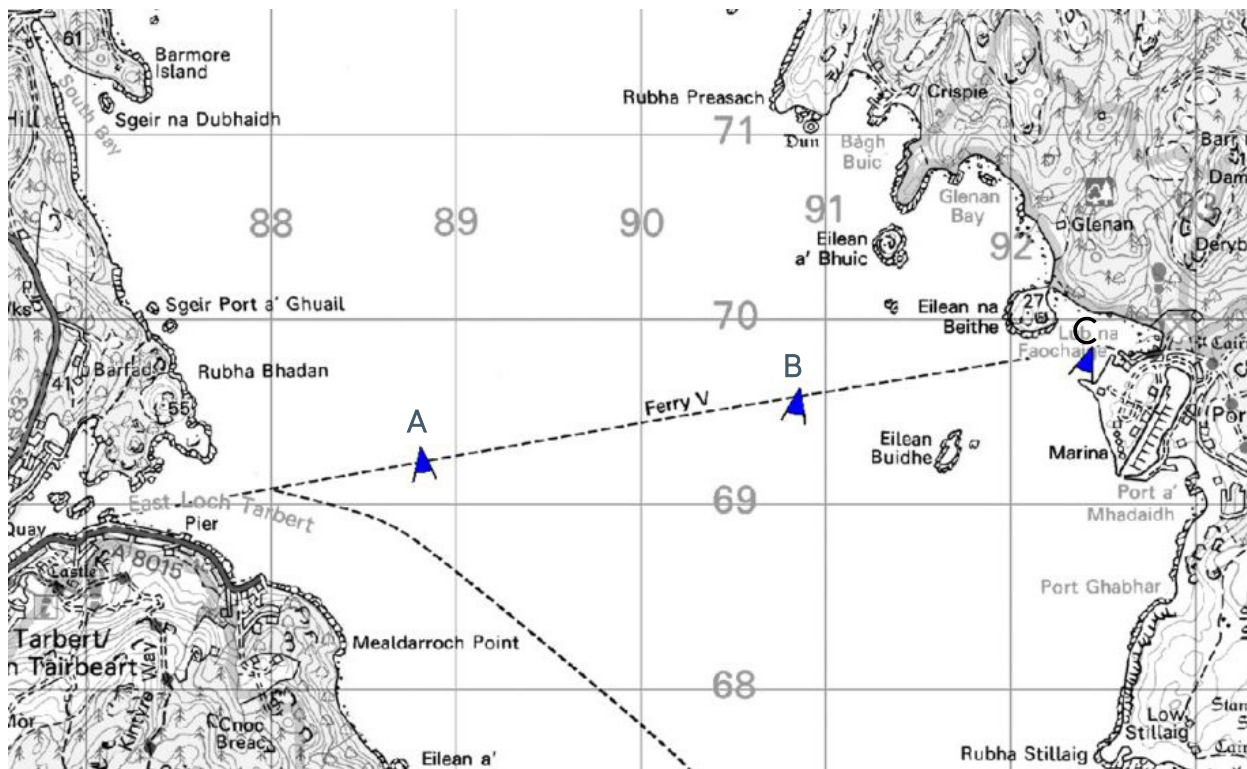

This appendix includes a set of sequential wireframes and photographs to aid the assessment from these route receptors. Each wireframe and photograph illustrates a 40 degree included angle, as taken with a fixed 50mm camera lens taken at regular intervals. Due to the difficulty of producing photomontage visualisations from moving ferries, a single frame photomontage from the two key routes is included.

Due to the speed of ferries and difficulty in precise alignments the photographs may not always line up with the wireframes and accuracy is approximate. They are there to provide context only. Due to the variability of weather conditions, tides and operational requirements ferries do not always take the exact same route and wireframe locations on the plans match the route the ferry took on the day of the assessment and when photographs were taken.

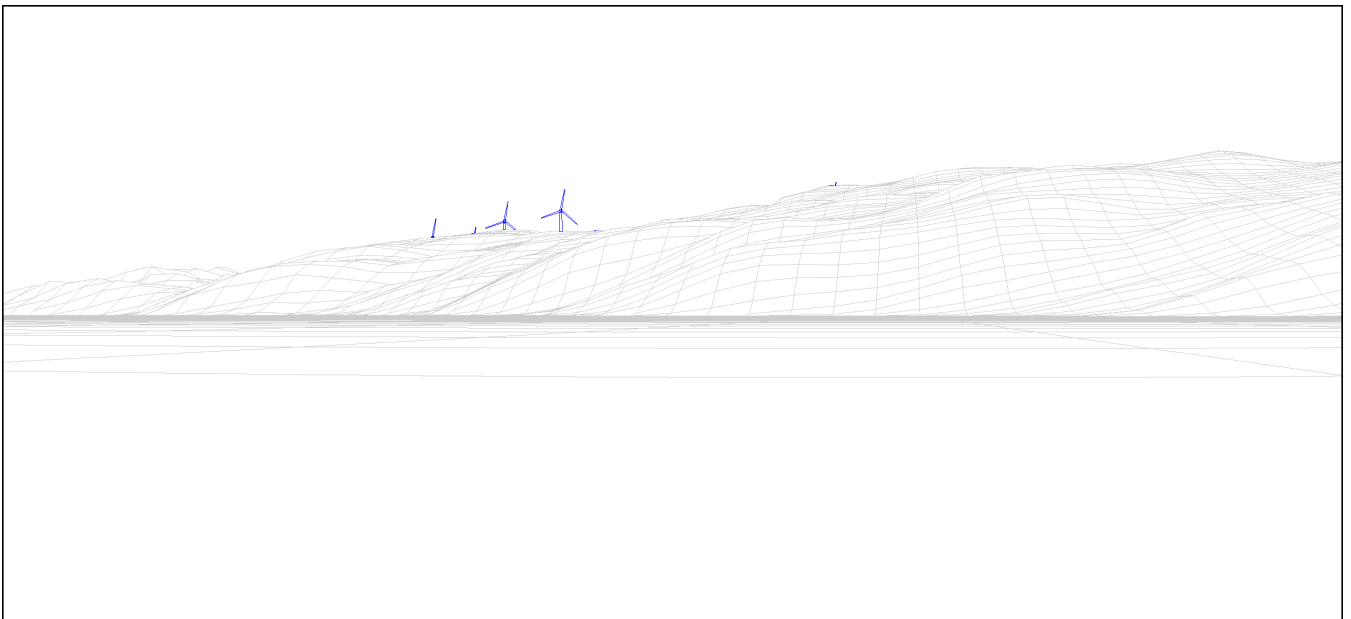

Some routes may also be represented by Viewpoints within the assessment, where this is the case the Viewpoints are noted.

Ferry route between Portavadie and Tarbert, Kintyre

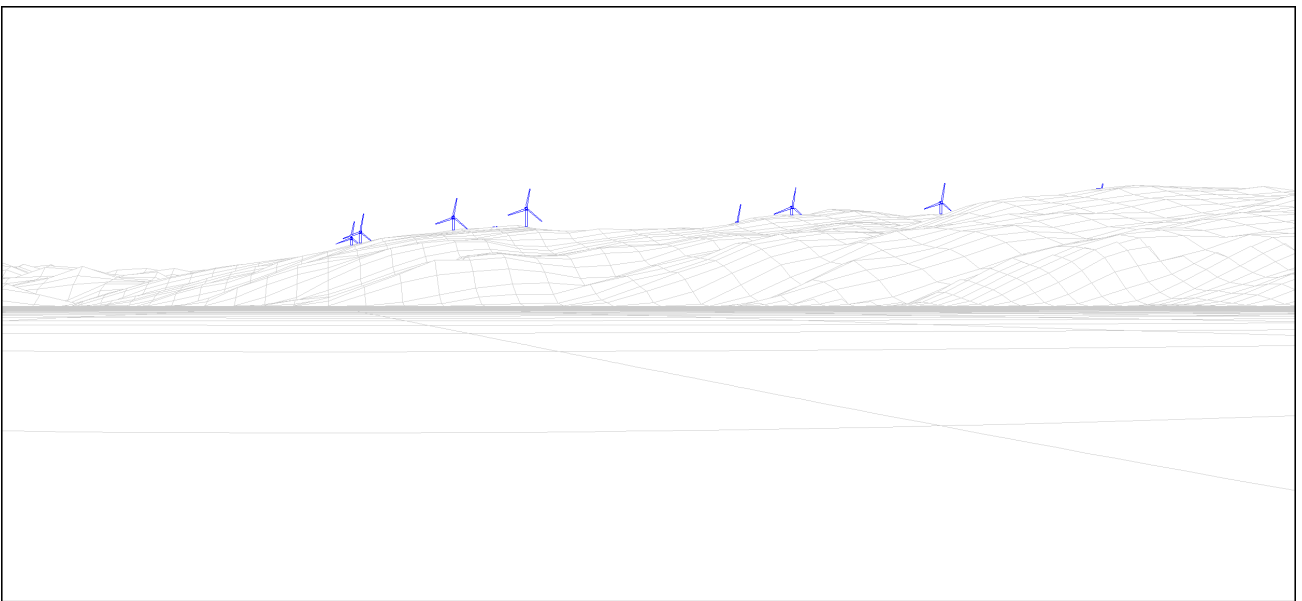

There would be no visibility at the Tarbert ferry terminal. **Viewpoint 5** is representative of view at the ferry terminal at Portavadie.

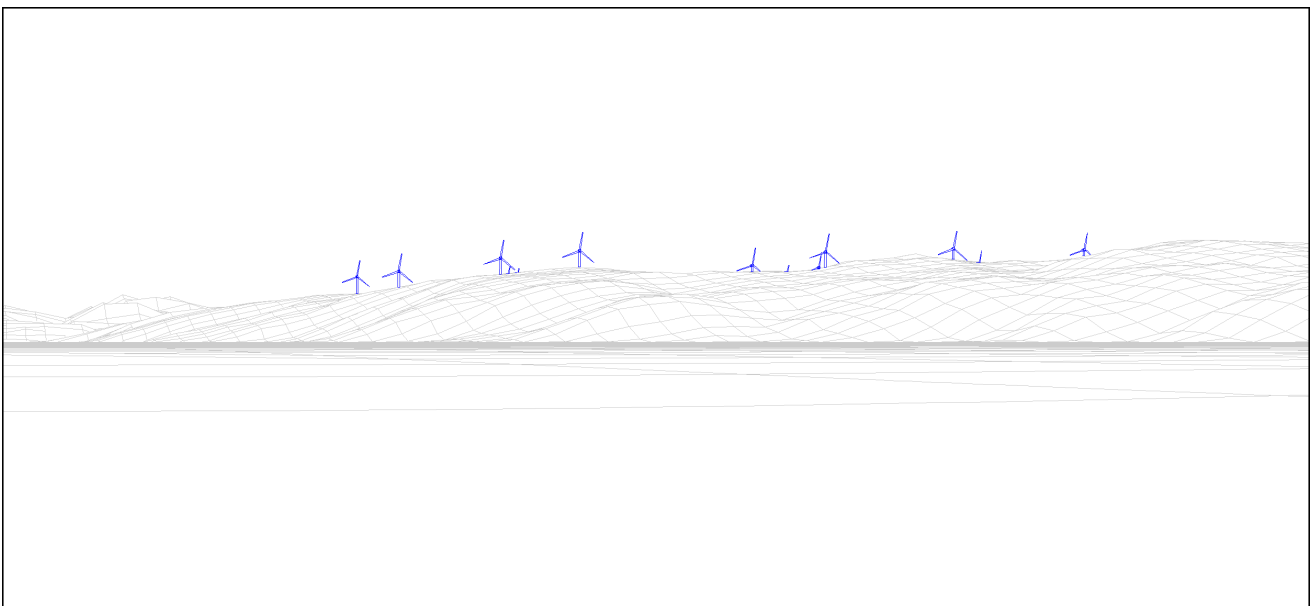

Point A (Photo and wireframe below)

Point B (Photo and wireframe below)

Point C left (Photo and wireframe below)

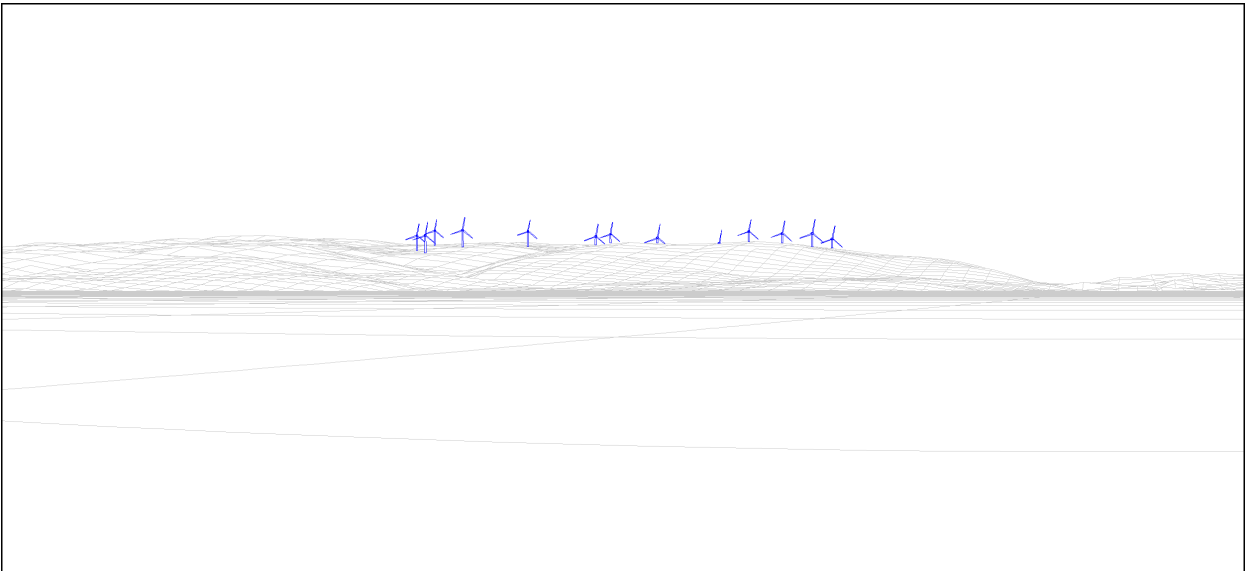

Point C: SINGLE FRAME PHOTOMONTAGE - Portavadie to Tarbert

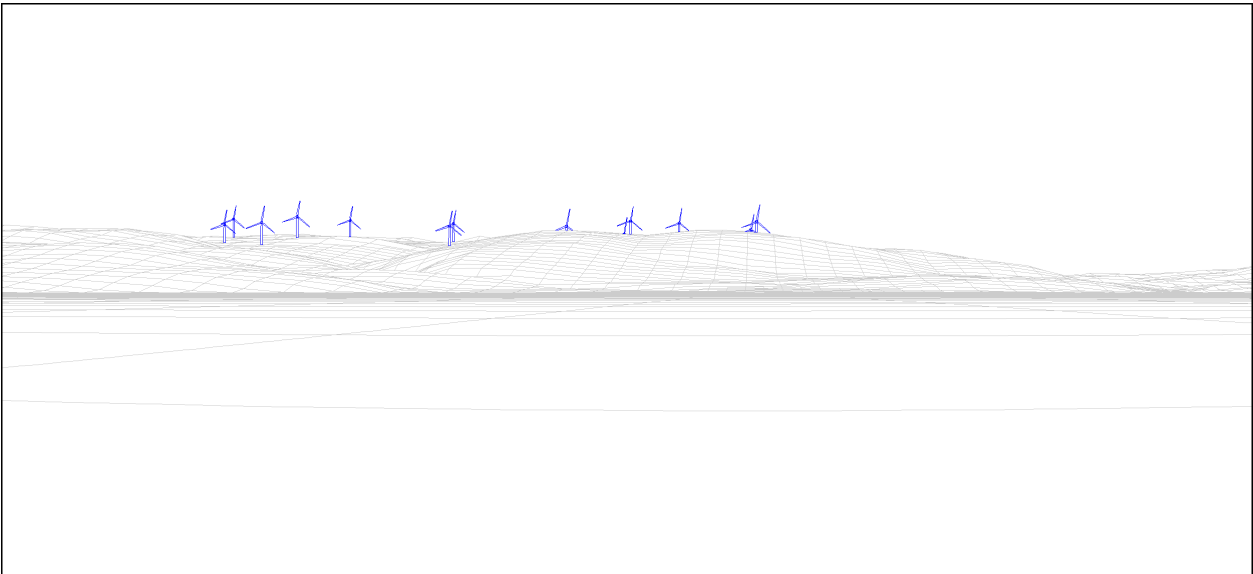

When viewed at a comfortable arms length, this image is representative of the maximum of view of clear vision but is not representative of scale and distance.

Distance to nearest turbine: 7816m Camera: Canon EOS 5D Focal length: 50mm
Camera height: 1.5m Date: 03/11/2021 Time: 08:32
Easting: 192415 Northing: 669860 AOD: approx. 10m Direction of View: 199.7°

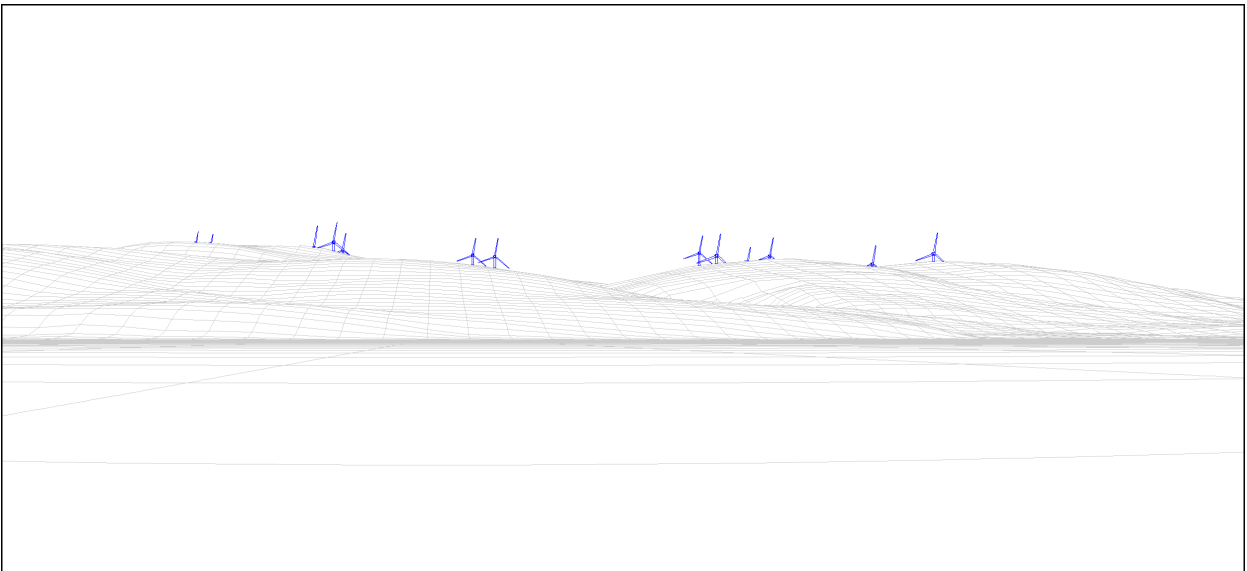

Point D (Photo and wireframe below)

Point E (Photo and wireframe below)

Point F (Photo and wireframe below)

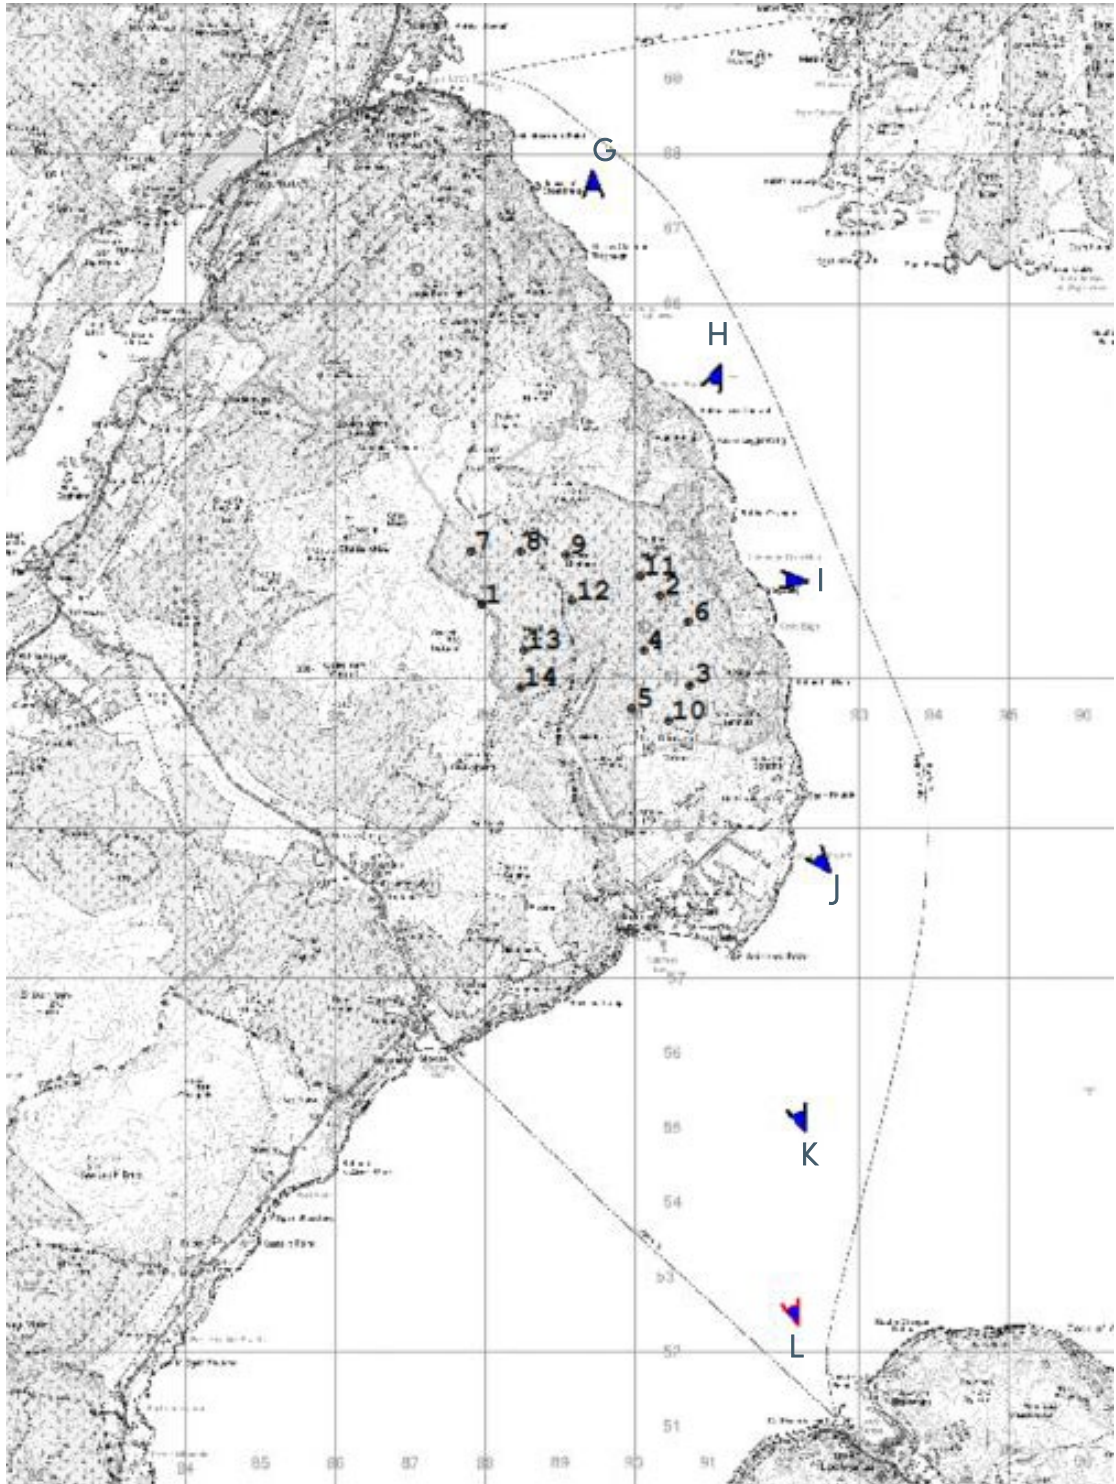

Point F: SINGLE FRAME PHOTOMONTAGE - Lochranza to Claonaig Ferry

When viewed at a comfortable arms length, this image is representative of the maximum of view of clear vision but is not representative of scale and distance.

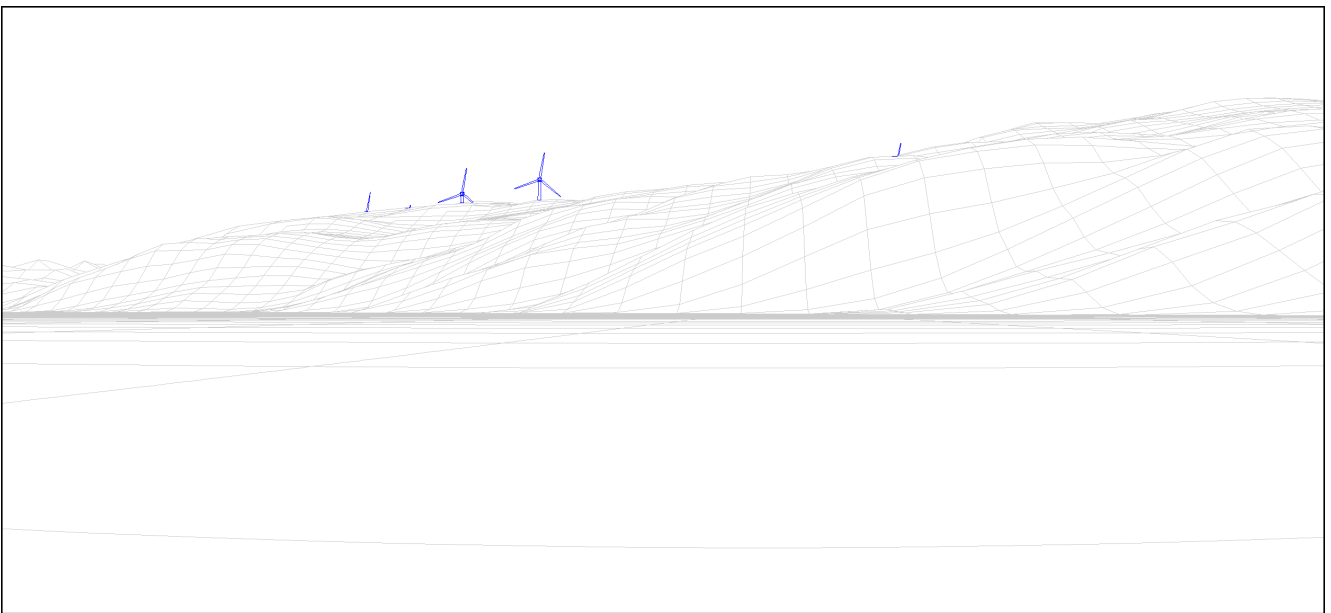

Distance to nearest turbine: 6111m Camera: Sony ILCE-7RM3 Focal length: 50mm
Camera height: 1.5m Date: 02/09/2021 Time: 17:23
Easting: 188955 Northing: 654545 AOD: approx. 10m Direction of View: 5.9°

1.2 Ferry route between Lochranza, Arran and Tarbert, Kintyre

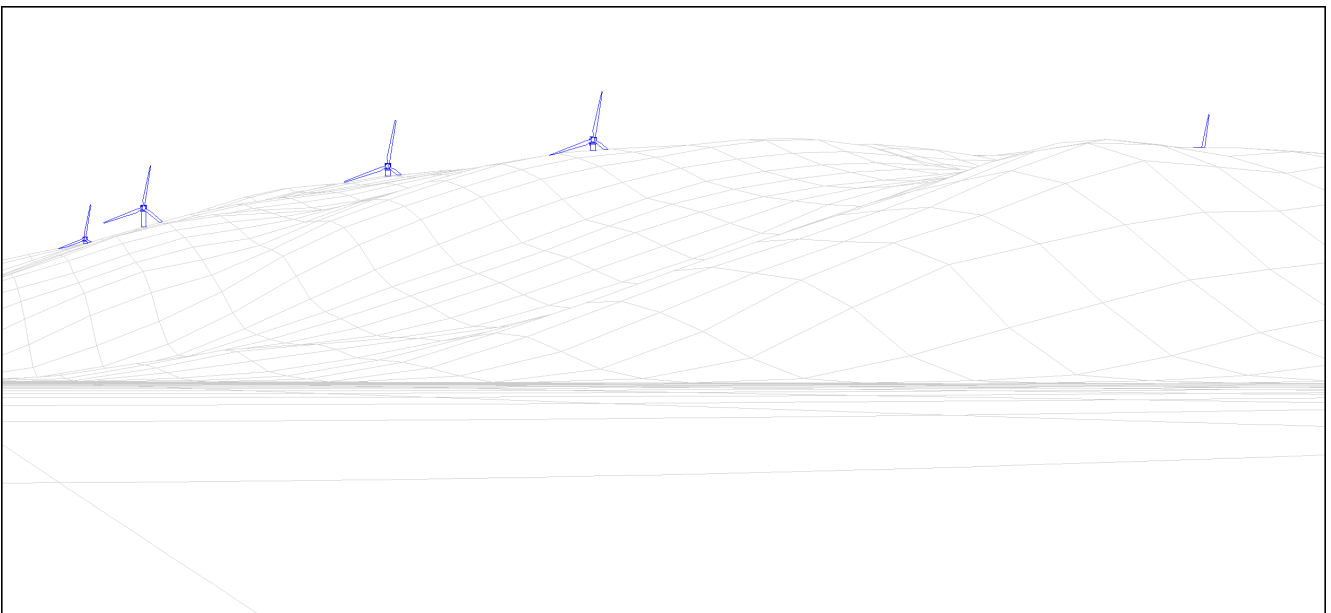

There is a service on the winter timetable only (Easter to end Oct) with only a single passage per day. There would be no visibility from the Ferry terminal at Tarbert. Viewpoint 9 is representative of views from Ferry Terminal at Lochranza.
